

Dear customer,

Please read all of the following information. This should answer many of your questions and help your opening go more smoothly. **There are things you need to prepare and potential additional costs.**

Our pool opening service includes:

- Removal of winter cover.
- **BROOM** off and fold cover. Empty and roll up water bags*.
- Removal of all winter plugs.
- Reassemble filtration system: basic re-assembly only. If your grid or cartridges have been previously removed, there is an additional **\$100.00 labor fee** plus the cost of new O-rings.
- Inspect filtration system and pool for any damage.
- **Start pool and light heater***. If the gas has been shut off and locked out by the gas company, the customer must arrange to open and unlock the gas before we arrive. If the gas is not accessible upon our arrival, you may have the gas company fire up and start your heater, or you can have us back at the return trip charge fee of \$100. If the heater does not fire up and needs service, the rate is the current hourly labor charge plus parts. The same applies for a propane heater; please make sure the tanks are full before our arrival.
- Install ladder(s) and diving board*
- Add our chemicals if **purchased separately**. **If you are supplying your own chemicals, you may add them after we leave. We can no longer add any chemicals unless they originate from us.**
- **Up to 30 minutes of cover drain time.**

*If applicable

Before Hometown arrives, the customer is expected to:

- 1. Drain the top of the pool cover as much as possible**
- 2. Fill the pool to operating level under the cover (half-way up the skimmer)**
- 3. Make sure the power is ON**
- 4. Leave access to supplies and equipment**
- 5. Make arrangements for payment. We will not provide services without payment.**

- **After the included 30 minutes of cover drain time, there is a minimum automatic charge of \$100.00 for pump time up to an additional 30 minutes, and \$100.00 every 30 minutes thereafter.** If **YOU** drain off your cover as much as possible with your own cover pump, we will be able to finish draining your cover within the standard time. If you cannot drain your cover and have excessive water on the cover, please inform us ahead of time so that we may properly schedule the time, and possibly drain your cover prior to your opening. Failure to alert us of the need for extra pump time may require us to reschedule your opening due to our scheduling constraints. **(Take care that there are no holes in your winter cover that would have you drain your pool as you drain your cover).**
- If the pool was drained down or has lost some water over the winter, please refill your pool to the PROPER operating level (usually half-way up the wall skimmer). **If a return trip is required to start your pool, there will be an additional charge of \$100.00.**
- If you will not be home during your opening, please leave everything for the pool outside or in an UNLOCKED shed. If we cannot locate the parts for reassembling the filtration area, we will supply new ones and add the cost to your bill. Also please make sure the POWER is on for the filtration system and any related outlets.

We recommend that you wait 24 hours before you begin balancing your water. The water needs to be fully circulated at least twice to get a good mix and an accurate reading. Water that has been sitting for 5 to 7 months will give inaccurate test results if read immediately after opening. You are welcome to bring your water in to our stores for a FREE water test. If you typically purchase your chemicals elsewhere, please have them test your water - most testing systems are set up to properly dose the chemicals that are being sold at that location.
